Spicy Mix Micro Greens	100% Organic	0.05	acres
Sunflower Micro Greens	100% Organic	0.05	acres
Mizuna Micro Greens	100% Organic	0.05	acres

Overall your operation is in compliance with the standards. No compliance issues were noted.

Please note that your operation had submitted labels for review, on July 12, 2017, these labels have been approved by OneCert. Find copies of approved labels attached.

Your products comply with the US-Canada Organic Equivalency Arrangement. The following statement should accompany any products produced under this arrangement: "Certified in compliance with the terms of the US-Canada Organic Equivalency Arrangement." This statement is a requirement so that products crossing the borders are verified to meet the terms of the USCOEA and must appear on documentation travelling with the shipment. The attestation may be included on the organic certificate, a transaction certificate, statement on bill of lading or purchase order or any other affirmative attestation.

Your certificate, inspection report, and exit interview are enclosed. Please examine the certificate carefully to be sure that all information is listed correctly.

Once certified, a production or handling operation's organic certification continues in effect until surrendered, suspended or revoked. An organic system plan update is due each year followed by an on-site inspection to verify continued compliance. Your next annual update is due on March 31, 2018.

Be sure to notify OneCert of any application of a prohibited substance to any certified field or product and of any changes to your organic system that may affect your certification. According to NOP, failure to notify certifier of changes and use of prohibited substances are the top reasons for suspension or revocation of certification.

Best regards,

A handwritten signature in blue ink that reads "Sam Welsch". The signature is fluid and cursive, with the first name "Sam" and last name "Welsch" clearly distinguishable.

Sam Welsch
